Your Prescription for a Healthy Lifestyle!

You + vibeRx = Health

Today's Challenge: Does This Sound Like You?

Today, people are living longer but our lifestyles are busier, more demanding, thus leaving little time to care for ourselves.

Ask yourself the following questions:

- Am I feeling more stressed?
- Does my lower back hurt?
- Am I feeling drained of energy and constantly fatigued?
- Do my feet hurt?
- Am I overweight?
- Do my joints hurt?
- Do I have enough time in my day to exercise?
- Do I feel good?

The Problem:

Increased health risks occur due to lack of movement, circulation, and the introduction of environmental and naturally occurring toxins.

The Solution:

Affordable, cutting edge technology available to you while in the comfort of your home or office allowing you to get back in control of your "physical self" and make the transition to a healthier YOU!!

What People Are Saying.....

"I have diabetes, and neuropathy is one of the problems that I face on a daily basis. I had the opportunity to try your system at a recent seminar for just 10 minutes. Afterwards, I was walking around the show and realized I was able to feel my feet for the first time in six months! In fact, the feeling lasted for weeks, even though I did not have a chance to use your equipment again. This product is amazing and I bought one for my office!" - Bonnie D., WA

Benefits of WBV Technology

For just pennies and a few minutes a day, you can experience and reap the benefits of Whole Body Vibration (WBV) technology

Benefits include :

- ↑ Metabolism (accelerating weight loss)
- ↑ Circulation enhancing the body's ability to heal and regenerate itself (anti-aging)
- ↑ Serotonin production (the body's 'feel good' hormone)
- ↑ Muscle tone and Bone Mass/Density
- ↑ Lymphatic drainage (detoxifies the blood and reduces congestion in the fat cells)
- ↑ Balance and mobility
- ↑ Core muscle strengthening and conditioning

Read the Research for Yourself

WBV technology was developed in the 1970's and has been further researched over the past three decades for use by athletes worldwide. (see research on vibeRx.com)

Why it Works, Why it's Better

Based on research conducted for the Russian Space program, it was determined that muscle tissue actually responds better to a certain stimulus produced within a specific frequency range (see chart). Our machine is designed to provide the necessary stimulus within that ideal range. Additionally, because our vibration platform moves within a displacement range of only a few centimeters, there is even less impact on your joints than normal activities such as walking for example! And unlike other WBV machines, our patented technology simulates normal body movement and is therefore more natural feeling and fun to use.
